Every number is this game's projection from the value model, not a season average. Team volume comes from each side's pace, the projected score and the opponent; player lines are the team's volume times the player's share and efficiency, adjusted for this defense. Dial ranks are out of the 120 teams playing this week. Quarterback lines assume he starts. College football has no official injury report: Out and Doubtful come from Covers.com and get no projection, and their usage goes to the teammates who play. Injured linemen and defenders are listed but don't change the numbers.
