| Neutral early-down pass rate | 62.8% |
| Turnover margin | +3 |

Nothing unusual: record, turnovers and close games are in line with the efficiency.

# EPA line vs. the market

The EPA line is what the ratings alone say about each game. A big gap is not a bet: more often the market knows something the ratings can't see, such as a quarterback injury, the weather or a team resting starters. Treat it as a game to look into.

| GAME | DAY | EPA LINE | MARKET | SIDE GAP | EPA TOTAL | MARKET | TOTAL GAP |

# EPA ratings, every FBS team

Net is offense minus defense, in adjusted EPA per play. The shift columns show how many spots a unit moves once schedule and garbage time are accounted for. The flags list results likely to even out. Select a column heading to sort.

| # ↑ | TEAM | RECORD | NET | OFFENSE | DEFENSE | PASS OFF. | RUSH OFF. | OFF. SHIFT | DEF. SHIFT | REGRESSION FLAGS |

# How the numbers are built

1. Take every pass and run play this season from cfbfastR play-by-play, which carries EPA and success for each play. FCS opponents are pooled into one team.
2. Drop garbage time (a lead over 43, 37, 27 or 21 points in quarters 1 to 4), kneels and plays wiped out by a penalty.
3. Fit one regression across all plays so each team gets an offense rating and a defense rating, with opponent strength and home field separated out. Pass and run get their own fits.
4. Project each game: each offense's rating plus the other defense's, times expected plays, plus 2.5 points for home field (none at a neutral site).
5. Pull the projected totals toward the league average. The spreads are left as they are: the regression already shrinks the ratings, and pulling them further made them worse.

Not included: quarterback injuries, weather, rest and travel, recruiting and last season's results.

## Does it predict anything yet?

Each week from 3 to 10, ratings were built from earlier weeks only and used to project that week's 462 games. Average miss on the final margin, in points (lower is better):

The closing line still beats the ratings. For now they work best as context and as a way to flag games for a closer look, not as picks.
