| Rush Yds / G | **134.5** #101 | **135.1** #60 | Even |
| Rush Yds / Att | **4.03** #94 | **3.95** #63 | Even |
| Pass Yds / G | **215.4** #84 | **198.2** #46 | Even |
| INT / G | **1.38** #135 | **0.5** #93 | OHIO |
| TOUCHDOWNS (PER GAME) | | | |
| Rush TD / G | **1** #118 | **1.62** #82 | Even |
| Pass TD / G | **1.38** #81 | **1** #24 | OHIO |
| FINISHING DRIVES | | | |
| Pts / trip (40) | **3.58** #94 | **3.41** #56 | Even |
| 3rd down % | **44.9** #38 | **38.5** #61 | Even |
| BIG PLAYS | | | |
| Explosive % | **13.6** #36 | **10.2** #46 | Even |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **8.2** #112 | **6.8** #58 | Even |
| Havoc rate % | **19.3** #134 | **17.8** #28 | OHIO |

### Pace and tendency

Both teams combined: **127.3 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| OHIO Ohio | **62.1** #105 | **38.6%** #122 |
| AKR Akron | **65.2** #69 | **50.5%** #31 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **130.1 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| BUFF Buffalo | **72.5** #9 | **40.1%** #113 |
| M-OH Miami (OH) | **57.6** #134 | **44.4%** #81 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **13.6** #46 | **14.1** #100 | Even |

## Pace and tendency

Both teams combined: **121.9 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| BALL Ball State | **63.0** #94 | **46.4%** #63 |
| MASS Massachusetts | **58.9** #129 | **42.5%** #100 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **133.9 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| TOL Toledo | **70.2** #22 | **45.1%** #79 |
| SAC Sacramento State | **63.7** #87 | **50.7%** #29 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **16.8** #111 | **13.5** #108 | Even |

## Pace and tendency

Both teams combined: **125.1 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| CMU Central Michigan | **59.0** #128 | **36.8%** #128 |
| EMU Eastern Michigan | **66.1** #62 | **55.8%** #8 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **139.3 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| JMU James Madison | **69.3** #30 | **44.3%** #85 |
| USM Southern Miss | **70.0** #25 | **49.1%** #43 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **13.1** #38 | **22.6** #2 | VT |

### Pace and tendency

Both teams combined: **138.3 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| VT Virginia Tech | **70.8** #19 | **50.1%** #33 |
| SMU SMU | **67.5** #50 | **48.2%** #48 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **6.2** #79 | **7.9** #26 | Even |
| Havoc rate % | **16.3** #100 | **17.3** #39 | USF |

### Pace and tendency

Both teams combined: **125.4 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| USF South Florida | **57.9** #133 | **44.4%** #84 |
| ECU East Carolina | **67.5** #50 | **43.9%** #91 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **133.3 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| NEB Nebraska | **71.5** #12 | **47.7%** #54 |
| ILL Illinois | **61.8** #111 | **48.6%** #46 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **125.1 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| UNM New Mexico | **61.6** #113 | **30.7%** #133 |
| NEV Nevada | **63.5** #88 | **40.4%** #112 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **133.8 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| TCU TCU | **66.4** #59 | **49.6%** #38 |
| ARIZ Arizona | **67.4** #52 | **52.5%** #19 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **139.6 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ISU Iowa State | **62.2** #100 | **40.1%** #114 |
| BAY Baylor | **77.4** #3 | **46.8%** #61 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **3.6** #18 | **7.6** #37 | Even |
| Havoc rate % | **16.0** #91 | **20.7** #7 | UCLA |

### Pace and tendency

Both teams combined: **128.5 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| UCLA | **66.6** #58 | **39.0%** #118 |
| Minnesota | **61.9** #109 | **52.3%** #21 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **8.0** #107 | **4.2** #116 | Even |
| Havoc rate % | **14.8** #71 | **17.8** #28 | Even |

### Pace and tendency

Both teams combined: **131.2 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| PSU Penn State | **67.8** #47 | **45.3%** #75 |
| WASH Washington | **63.4** #90 | **57.4%** #6 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **3.9** #25 | **5.9** #80 | UTAH |
| Havoc rate % | **13.8** #51 | **18.1** #23 | Even |

### Pace and tendency

Both teams combined: **129.1 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| BYU BYU | **60.5** #122 | **44.4%** #83 |
| UTAH Utah | **68.6** #35 | **44.3%** #86 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **5.9** #71 | **8.8** #16 | CLEM |
| Havoc rate % | **14.8** #71 | **18.8** #16 | CLEM |

### Pace and tendency

Both teams combined: **147.8 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| CLEM Clemson | **68.2** #40 | **48.4%** #47 |
| SYR Syracuse | **79.6** #1 | **48.0%** #50 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **13.1** #38 | **11.8** #124 | CONN |

### Pace and tendency

Both teams combined: **123.2 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| UNC North Carolina | **59.2** #127 | **51.9%** #24 |
| CONN UConn | **64.0** #85 | **41.5%** #106 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **5.1** #52 | **8.8** #16 | Even |
| Havoc rate % | **13.6** #46 | **17.1** #40 | Even |

### Pace and tendency

Both teams combined: **134.0 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| DUKE Duke | **66.0** #63 | **42.6%** #98 |
| NCSU NC State | **68.0** #45 | **46.2%** #65 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **4.8** #46 | **4.7** #107 | WIS |
| Havoc rate % | **14.6** #65 | **12.7** #117 | WIS |

### Pace and tendency

Both teams combined: **120.4 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| RUTG Rutgers | **62.9** #95 | **45.5%** #73 |
| WIS Wisconsin | **57.5** #135 | **42.6%** #99 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **8.1** #109 | **6.9** #53 | ODU |
| Havoc rate % | **17.4** #122 | **16.4** #52 | ODU |

### Pace and tendency

Both teams combined: **126.6 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ODU Old Dominion | **62.0** #108 | **47.8%** #52 |
| CCU Coastal Carolina | **64.6** #76 | **47.0%** #58 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **138.7 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| TA&M Texas A&M | **67.6** #48 | **46.1%** #67 |
| SC South Carolina | **71.1** #16 | **46.6%** #62 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **126.3 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ULM UL Monroe | **64.8** #74 | **50.4%** #32 |
| ARST Arkansas State | **61.5** #115 | **48.2%** #49 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **140.5 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ALA Alabama | **61.5** #115 | **46.2%** #65 |
| LSU LSU | **79.0** #2 | **46.8%** #60 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **17.7** #127 | **10.3** #135 | Even |

### Pace and tendency

Both teams combined: **125.4 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| CLT Charlotte | **59.9** #125 | **49.7%** #36 |
| UAB UAB | **65.5** #66 | **37.2%** #126 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **2.4** #8 | **3.6** #127 | GASO |
| Havoc rate % | **14.5** #63 | **15.1** #77 | Even |

### Pace and tendency

Both teams combined: **137.2 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| MRSH Marshall | **68.1** #44 | **44.1%** #89 |
| GASO Georgia Southern | **69.1** #32 | **58.4%** #4 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **133.4 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WKU Western Kentucky | **72.2** #10 | **49.5%** #40 |
| MTSU Middle Tennessee | **61.2** #118 | **52.3%** #22 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **15.7** #89 | **14.3** #92 | Even |

## Pace and tendency

Both teams combined: **136.0 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| UCF | **64.1** #84 | **49.2%** #42 |
| Kansas | **71.9** #11 | **40.7%** #110 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **2.0** #6 | **4.8** #105 | UNT |
| Havoc rate % | **10.4** #9 | **15.5** #67 | UNT |

## Pace and tendency

Both teams combined: **132.7 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| RICE Rice | **61.8** #111 | **19.0%** #135 |
| UNT North Texas | **70.9** #18 | **49.0%** #44 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **16.3** #100 | **9.7** #138 | SJSU |

## Pace and tendency

Both teams combined: **126.4 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| NIU Northern Illinois | **62.2** #100 | **53.4%** #15 |
| SJSU San José State | **64.2** #82 | **49.3%** #41 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **129.2 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| MOST Missouri State | **61.6** #113 | **45.6%** #71 |
| FIU Florida International | **67.6** #48 | **49.6%** #39 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **16.0** #91 | **12.8** #116 | Even |

### Pace and tendency

Both teams combined: **130.1 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| VAN Vanderbilt | **61.5** #115 | **52.3%** #20 |
| MSST Mississippi State | **68.6** #35 | **47.5%** #55 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **137.1 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| BOIS Boise State | **70.2** #22 | **37.4%** #125 |
| CSU Colorado State | **66.9** #56 | **53.7%** #14 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **3.6** #18 | **6.9** #53 | Even |
| Havoc rate % | **14.8** #71 | **17.6** #35 | Even |

## Pace and tendency

Both teams combined: **123.1 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| SHSU Sam Houston | **62.1** #105 | **58.4%** #3 |
| JVST Jacksonville State | **61.0** #120 | **45.3%** #77 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **136.6 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| COLO Colorado | **68.2** #40 | **48.7%** #45 |
| ASU Arizona State | **68.4** #37 | **54.3%** #12 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **125.0 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| LOU Louisville | **61.9** #109 | **43.4%** #93 |
| GT Georgia Tech | **63.1** #93 | **53.2%** #16 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **0.8** #1 | **7.5** #41 | ND |
| Havoc rate % | **9.8** #8 | **13.8** #104 | ND |

### Pace and tendency

Both teams combined: **134.6 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| MIA Miami | **68.2** #40 | **45.6%** #72 |
| ND Notre Dame | **66.4** #59 | **46.0%** #69 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **136.8 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| AFA Air Force | **72.9** #8 | **11.1%** #138 |
| ARMY Army | **63.9** #86 | **16.9%** #136 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **133.3 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| OU Oklahoma | **64.2** #80 | **47.7%** #53 |
| FLA Florida | **69.1** #32 | **43.2%** #95 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **18.3** #133 | **14.3** #92 | Even |

### Pace and tendency

Both teams combined: **142.1 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WVU West Virginia | **73.9** #6 | **24.3%** #134 |
| TTU Texas Tech | **68.2** #40 | **44.3%** #87 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **121.5 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| FRES Fresno State | **58.6** #131 | **44.4%** #81 |
| USU Utah State | **62.9** #95 | **52.1%** #23 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **127.8 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| HAW Hawai'i | **70.4** #21 | **61.7%** #1 |
| UTEP UTEP | **57.4** #136 | **43.3%** #94 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **148.0 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| TXST Texas State | **73.9** #6 | **38.9%** #120 |
| ORST Oregon State | **74.1** #5 | **57.2%** #7 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **120.8 plays per game** (FBS average 131.4)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WYO Wyoming | **56.6** #138 | **35.3%** #131 |
| UNLV UNLV | **64.2** #80 | **39.9%** #117 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side is better by at least one FBS standard deviation (so it counts how big the gap is, not just rank spots). Adj. rows are adjusted for the offenses and defenses each team has faced, as on the EPA page; the per-game rows are not, so a soft or hard schedule shows in them. INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.
