| Pass Yds / G | **229.4** #68 | **207.7** #62 | Even |
| Pass TD / G | **1.14** #108 | **0.71** #9 | ARIZ |
| INT / G | **1** #109 | **0.29** #121 | Even |
| FINISHING DRIVES | | | |
| Pts / trip (40) | **4.06** #60 | **2.78** #10 | ARIZ |
| 3rd down % | **40.7** #74 | **36.5** #48 | ARIZ |
| BIG PLAYS | | | |
| Explosive % | **13.9** #35 | **10.7** #59 | Even |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **5.8** #69 | **7.8** #29 | ARIZ |
| Havoc rate % | **18.7** #132 | **16.1** #58 | ARIZ |

### Pace and tendency

Both teams combined: **134.5 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ARIZ Arizona | **66.6** #62 | **51.8%** #22 |
| TTU Texas Tech | **67.9** #47 | **45.9%** #75 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **5.9** #71 | **9.2** #13 | SMU |
| Havoc rate % | **15.4** #86 | **18.6** #17 | SMU |

### Pace and tendency

Both teams combined: **148.5 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| SMU SMU | **67.6** #53 | **47.7%** #53 |
| SYR Syracuse | **80.9** #1 | **47.8%** #51 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **2.7** #12 | **5.0** #100 | IOWA |
| Havoc rate % | **12.0** #24 | **16.3** #54 | IOWA |

## Pace and tendency

Both teams combined: **120.6 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WIS Wisconsin | **58.6** #132 | **41.4%** #101 |
| IOWA Iowa | **62.0** #105 | **46.5%** #63 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **12.6** #33 | **18.9** #15 | Even |

### Pace and tendency

Both teams combined: **133.0 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ND Notre Dame | **67.4** #57 | **45.2%** #80 |
| NAVY Navy | **65.6** #71 | **17.5%** #136 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **7.9** #107 | **7.3** #45 | MICH |
| Havoc rate % | **15.1** #82 | **16.4** #50 | MICH |

### Pace and tendency

Both teams combined: **125.7 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| MICH Michigan | **59.6** #124 | **39.1%** #117 |
| RUTG Rutgers | **66.1** #67 | **46.6%** #62 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **128.3 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| MRSH Marshall | **67.9** #47 | **47.2%** #57 |
| ODU Old Dominion | **60.4** #121 | **45.2%** #81 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **3.2** #18 | **7.8** #29 | Even |
| Havoc rate % | **12.0** #24 | **14.8** #84 | GAST |

### Pace and tendency

Both teams combined: **131.0 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| CCU Coastal Carolina | **64.1** #83 | **46.4%** #64 |
| GAST Georgia State | **66.9** #61 | **39.9%** #112 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **124.7 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| TEM Temple | **58.1** #135 | **36.5%** #126 |
| ECU East Carolina | **66.6** #62 | **44.6%** #87 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **17.5** #126 | **11.3** #133 | Even |

### Pace and tendency

Both teams combined: **126.8 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| STAN Stanford | **64.8** #77 | **53.3%** #16 |
| LOU Louisville | **62.0** #105 | **43.8%** #93 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **2.1** #6 | **5.4** #90 | BYU |
| Havoc rate % | **8.0** #3 | **17.3** #34 | BYU |

### Pace and tendency

Both teams combined: **128.3 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ASU Arizona State | **67.3** #58 | **52.9%** #17 |
| BYU BYU | **61.0** #117 | **43.1%** #95 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **5.4** #61 | **7.5** #37 | Even |
| Havoc rate % | **11.2** #14 | **20.5** #9 | Even |

### Pace and tendency

Both teams combined: **121.2 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| MINN Minnesota | **62.1** #102 | **51.5%** #24 |
| IU Indiana | **59.1** #127 | **37.1%** #122 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| INT / G | **1.43** #136 | **1.29** #10 | CSU |
| **FINISHING DRIVES** | | | |
| Pts / trip (40) | **2.22** #137 | **4.74** #134 | Even |
| 3rd down % | **35.4** #114 | **54.7** #137 | Even |
| **BIG PLAYS** | | | |
| Explosive % | **10.2** #115 | **19.2** #138 | Even |
| **PASS RUSH AND HAVOC** | | | |
| Sack rate % | **8.7** #119 | **4.3** #116 | Even |
| Havoc rate % | **18.8** #133 | **12.0** #126 | Even |

### Pace and tendency

Both teams combined: **131.7 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| CSU Colorado State | **68.6** #38 | **53.7%** #15 |
| USU Utah State | **63.1** #91 | **54.2%** #12 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **132.7 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| FIU Florida International | **69.6** #29 | **48.6%** #48 |
| LIB Liberty | **63.1** #91 | **32.1%** #132 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **133.4 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| UTAH Utah | **68.0** #44 | **45.5%** #78 |
| CIN Cincinnati | **65.4** #72 | **40.7%** #104 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **127.3 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| UNM New Mexico | **62.3** #100 | **31.4%** #133 |
| SJSU San José State | **65.0** #75 | **50.6%** #31 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Explosive % | **9.2** #125 | **14.6** #127 | Even |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **4.6** #47 | **3.7** #127 | PSU |
| Havoc rate % | **14.6** #71 | **14.8** #84 | Even |

### Pace and tendency

Both teams combined: **134.9 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| PUR Purdue | **68.3** #41 | **49.9%** #37 |
| PSU Penn State | **66.6** #62 | **47.6%** #54 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

|---|---|---|
| APP App State | **68.4** #40 | **49.9%** #38 |
| GASO Georgia Southern | **68.0** #44 | **58.5%** #3 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **4.5** #44 | **3.5** #129 | SDSU |
| Havoc rate % | **16.4** #101 | **12.5** #119 | Even |

### Pace and tendency

Both teams combined: **126.2 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WSU Washington State | **64.6** #79 | **54.0%** #13 |
| SDSU San Diego State | **61.6** #109 | **42.8%** #97 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **3.4** #21 | **6.3** #69 | PITT |
| Havoc rate % | **12.5** #30 | **13.2** #113 | PITT |

### Pace and tendency

Both teams combined: **130.5 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| GT Georgia Tech | **61.3** #115 | **51.5%** #27 |
| PITT Pittsburgh | **69.2** #33 | **51.5%** #25 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **3.7** #24 | **4.2** #120 | USC |
| Havoc rate % | **11.2** #14 | **17.7** #31 | Even |

### Pace and tendency

Both teams combined: **137.3 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| OSU Ohio State | **67.9** #47 | **44.9%** #84 |
| USC USC | **69.4** #30 | **51.5%** #26 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **135.1 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WASH Washington | **63.7** #86 | **55.3%** #9 |
| NEB Nebraska | **71.4** #11 | **46.0%** #72 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **8.6** #5 | **14.8** #84 | BOIS |

### Pace and tendency

Both teams combined: **143.7 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| TXST Texas State | **75.4** #5 | **36.7%** #125 |
| BOIS Boise State | **68.3** #41 | **35.3%** #129 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **12.7** #36 | **17.3** #34 | Even |

## Pace and tendency

Both teams combined: **131.9 plays per game** (FBS average 131.5)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ORST Oregon State | **72.3** #8 | **55.0%** #11 |
| FRES Fresno State | **59.6** #124 | **46.3%** #66 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.
