| INT / G | **0.57** #48 | **0.33** #113 | WKU |
| FINISHING DRIVES | | | |
| Pts / trip (40) | **3.59** #91 | **3.08** #31 | DEL |
| 3rd down % | **44.2** #48 | **35.4** #40 | Even |
| BIG PLAYS | | | |
| Explosive % | **10.0** #117 | **11.0** #68 | DEL |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **5.7** #75 | **7.6** #33 | DEL |
| Havoc rate % | **16.0** #98 | **16.6** #47 | DEL |

## Pace and tendency

Both teams combined: **135.4 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| DEL Delaware | **63.8** #86 | **55.6%** #9 |
| WKU Western Kentucky | **71.6** #12 | **48.2%** #50 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **121.7 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| KENN Kennesaw State | **65.5** #69 | **52.1%** #21 |
| MTSU Middle Tennessee | **56.2** #137 | **55.3%** #10 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **10.4** #13 | **13.1** #114 | UNT |

## Pace and tendency

Both teams combined: **147.0 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| FAU Florida Atlantic | **74.7** #6 | **59.0%** #2 |
| UNT North Texas | **72.3** #8 | **49.0%** #45 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **14.8** #73 | **21.1** #7 | BAY |

## Pace and tendency

Both teams combined: **141.9 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| BAY Baylor | **81.2** #1 | **47.4%** #59 |
| UCF UCF | **60.7** #117 | **45.5%** #72 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **17.8** #127 | **15.9** #58 | ARIZ |

## Pace and tendency

Both teams combined: **132.2 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ARIZ Arizona | **65.7** #67 | **51.9%** #22 |
| TTU Texas Tech | **66.5** #59 | **43.9%** #85 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **6.4** #87 | **9.6** #11 | SMU |
| Havoc rate % | **15.9** #95 | **19.2** #15 | SMU |

### Pace and tendency

Both teams combined: **148.0 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| SMU | **67.5** #53 | **50.3%** #33 |
| Syracuse | **80.5** #2 | **48.9%** #46 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **2.7** #12 | **4.3** #117 | IOWA |
| Havoc rate % | **10.3** #11 | **15.4** #74 | IOWA |

## Pace and tendency

Both teams combined: **120.1 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WIS Wisconsin | **58.8** #126 | **43.6%** #88 |
| IOWA Iowa | **61.3** #113 | **45.9%** #70 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| **PASS RUSH AND HAVOC** | | | |
| Sack rate % | **11.0** #134 | **7.5** #37 | ND |
| Havoc rate % | **12.3** #31 | **18.9** #20 | Even |

### Pace and tendency

Both teams combined: **131.2 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ND Notre Dame | **67.4** #54 | **45.2%** #75 |
| NAVY Navy | **63.8** #86 | **18.3%** #136 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **5.5** #68 | **10.1** #6 | BGSU |
| Havoc rate % | **10.9** #18 | **13.8** #103 | WMU |

### Pace and tendency

Both teams combined: **115.8 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| BGSU Bowling Green | **57.1** #134 | **40.1%** #109 |
| WMU Western Michigan | **58.7** #127 | **37.5%** #120 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **11.8** #24 | **15.9** #58 | MISS |

### Pace and tendency

Both teams combined: **137.5 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| AUB Auburn | **69.8** #23 | **48.1%** #52 |
| MISS Ole Miss | **67.7** #49 | **53.5%** #17 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **2.7** #12 | **7.8** #28 | Even |
| Havoc rate % | **11.8** #24 | **14.8** #81 | GAST |

### Pace and tendency

Both teams combined: **131.9 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| CCU Coastal Carolina | **64.1** #83 | **46.4%** #65 |
| GAST Georgia State | **67.8** #48 | **38.4%** #118 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **123.1 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| TEM Temple | **58.1** #130 | **36.5%** #122 |
| ECU East Carolina | **65.0** #73 | **44.3%** #83 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **17.5** #123 | **11.5** #130 | Even |

### Pace and tendency

Both teams combined: **126.4 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| STAN Stanford | **64.4** #78 | **53.2%** #18 |
| LOU Louisville | **62.0** #108 | **43.8%** #86 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| **BIG PLAYS** | | | |
| Explosive % | **14.7** #32 | **11.1** #72 | BYU |
| **PASS RUSH AND HAVOC** | | | |
| Sack rate % | **1.9** #7 | **5.2** #91 | BYU |
| Havoc rate % | **7.2** #2 | **15.7** #67 | BYU |

### Pace and tendency

Both teams combined: **127.0 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ASU Arizona State | **67.0** #56 | **53.7%** #15 |
| BYU BYU | **60.0** #120 | **42.5%** #94 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **10.7** #16 | **20.4** #10 | Even |

## Pace and tendency

Both teams combined: **122.3 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| MINN Minnesota | **62.3** #104 | **53.2%** #19 |
| IU Indiana | **60.0** #120 | **38.2%** #119 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **130.4 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| CSU Colorado State | **68.2** #42 | **55.9%** #7 |
| USU Utah State | **62.2** #106 | **54.3%** #14 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| FIU Florida International | **71.7** #11 | **49.0%** #44 |
| LIB Liberty | **63.5** #90 | **32.6%** #132 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **9.6** #8 | **17.2** #40 | WAKE |

## Pace and tendency

Both teams combined: **130.2 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| UVA Virginia | **65.9** #66 | **40.1%** #110 |
| WAKE Wake Forest | **64.3** #81 | **49.4%** #41 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **8.2** #110 | **7.8** #28 | SC |
| Havoc rate % | **17.7** #125 | **14.7** #83 | SC |

## Pace and tendency

Both teams combined: **134.3 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| SC South Carolina | **72.3** #8 | **47.3%** #60 |
| OU Oklahoma | **62.0** #108 | **47.2%** #62 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **5.4** #65 | **7.7** #31 | NEV |
| Havoc rate % | **15.0** #78 | **13.3** #109 | UCLA |

## Pace and tendency

Both teams combined: **129.7 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| NEV Nevada | **63.2** #93 | **40.3%** #107 |
| UCLA UCLA | **66.5** #59 | **37.1%** #121 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **5.0** #56 | **6.0** #78 | Even |
| Havoc rate % | **18.5** #130 | **13.9** #101 | OKST |

### Pace and tendency

Both teams combined: **131.1 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| OKST Oklahoma State | **69.8** #23 | **50.1%** #34 |
| ISU Iowa State | **61.3** #113 | **39.7%** #112 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| FINISHING DRIVES | | | |
| Pts / trip (40) | **3.39** #108 | **3.66** #75 | WSU |
| 3rd down % | **31.5** #132 | **38.0** #65 | WSU |
| BIG PLAYS | | | |
| Explosive % | **11.1** #97 | **13.2** #114 | Even |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **4.7** #51 | **3.9** #123 | SDSU |
| Havoc rate % | **16.8** #112 | **13.0** #116 | Even |

## Pace and tendency

Both teams combined: **123.8 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WSU Washington State | **63.4** #92 | **53.6%** #16 |
| SDSU San Diego State | **60.4** #119 | **42.1%** #96 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| PASS RUSH AND HAVOC | | | |
| Sack rate % | **3.1** #22 | **6.4** #62 | PITT |
| Havoc rate % | **12.1** #29 | **13.8** #103 | PITT |

## Pace and tendency

Both teams combined: **132.1 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| GT Georgia Tech | **61.5** #111 | **51.5%** #26 |
| PITT Pittsburgh | **70.6** #16 | **50.8%** #29 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| OSU Ohio State | **67.9** #46 | **44.9%** #78 |
| USC USC | **68.4** #38 | **49.3%** #43 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **132.9 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| ARMY Army | **64.5** #77 | **15.9%** #137 |
| MEM Memphis | **68.4** #38 | **40.4%** #106 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **7.8** #106 | **5.2** #91 | Even |
| Havoc rate % | **15.2** #84 | **9.2** #138 | UNLV |

### Pace and tendency

Both teams combined: **127.4 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| NIU Northern Illinois | **62.5** #102 | **54.9%** #13 |
| UNLV UNLV | **64.9** #75 | **38.8%** #116 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Passing

| Player | Yds/G | TD | Int | Cmp/G |
|---|---|---|---|---|
| Jayden Mandal | 199 | 1.14 | 0.14 | 17.6 |
| Khristian Martin | 35.5 | 0.5 | 0 | 1.5 |
| Jordan Malau'ulu | 21 | 0 | 0 | 1 |

### Rushing

| Player | Yds/G | TD | Y/A | A/G |
|---|---|---|---|---|
| Rayshon Luke | 55.5 | 0.17 | 6.4 | 8.7 |
| Bryson Donelson | 42.7 | 0.71 | 4.6 | 9.3 |
| Julius Gillick | 20.4 | 0.57 | 4.2 | 4.9 |
| Jayden Mandal | 18.4 | 0.29 | 2.5 | 7.3 |
| Ezekiel Avit | 19 | 0 | 19 | 1 |
| Josiah Freeman | 17 | 1 | 8.5 | 2 |

### Receiving

| Player | Yds/G | TD | Y/R | Rec/G |
|---|---|---|---|---|
| Josiah Freeman | 70.7 | 0.33 | 13.7 | 5.17 |
| Ezekiel Avit | 53.3 | 0.57 | 17 | 3.14 |
| Jahlil McClain | 34 | 0.17 | 10.7 | 3.17 |
| Jake Appleget | 17.8 | 0 | 10.1 | 1.75 |
| Rayshon Luke | 17.2 | 0.2 | 6.1 | 2.8 |
| Gavin Correia | 12 | 0.17 | 9 | 1.33 |
| Jayon Farrar | 11.2 | 0 | 5.6 | 2 |

### Usage

| Player | Target share | Last 3 |
|---|---|---|
| Josiah Freeman | 27.8% | ↑ 31.4% |
| Ezekiel Avit | 17.8% | ↑ 20.9% |
| Jahlil McClain | 14.4% | 15.1% |
| Rayshon Luke | 9.4% | ↓ 3.5% |
| Gavin Correia | 8.3% | 8.1% |

Carry share: Bryson Donelson **29.8%** | Rayshon Luke **23.9%** | Jayden Mandal **23.4%**

Target share = share of team targets, from play-by-play; Last 3 = the same over the last three games (arrow when it moved 2 points or more). College data has no snap counts.
