| Rush TD / G | **0.5** #136 | **2.17** #125 | Even |
| Pass Yds / G | **247** #51 | **221.7** #89 | SHSU |
| Pass TD / G | **2** #40 | **0.5** #4 | NMSU |
| INT / G | **0.83** #87 | **0.83** #49 | NMSU |
| FINISHING DRIVES | | | |
| Pts / trip (40) | **2.82** #128 | **4.43** #122 | Even |
| 3rd down % | **37.9** #96 | **43.5** #107 | Even |
| BIG PLAYS | | | |
| Explosive % | **9.8** #121 | **11.0** #68 | NMSU |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **6.6** #89 | **7.4** #41 | NMSU |
| Havoc rate % | **18.9** #132 | **14.3** #92 | NMSU |

## Pace and tendency

Both teams combined: **127.3 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| NMSU New Mexico State | **63.0** #97 | **49.8%** #37 |
| SHSU Sam Houston | **64.3** #80 | **56.2%** #5 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## NMSU New Mexico State 2-4 CUSA

### Pace and tendency

Both teams combined: **129.0 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| LIB Liberty | **63.5** #90 | **32.6%** #132 |
| KENN Kennesaw State | **65.5** #69 | **52.1%** #21 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **135.2 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| DUKE Duke | **69.3** #31 | **41.6%** #100 |
| UVA Virginia | **65.9** #66 | **40.1%** #110 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **130.2 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| AFA Air Force | **71.3** #14 | **10.4%** #138 |
| WYO Wyoming | **58.9** #124 | **35.3%** #126 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **10.7** #133 | **10.7** #3 | LSU |
| Havoc rate % | **15.8** #90 | **21.6** #5 | LSU |

### Pace and tendency

Both teams combined: **148.7 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| LSU | **78.9** #3 | **45.5%** #71 |
| AUB Auburn | **69.8** #23 | **48.1%** #52 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **141.7 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WVU West Virginia | **76.4** #5 | **23.7%** #134 |
| TCU TCU | **65.3** #71 | **49.5%** #39 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **7.8** #4 | **18.0** #27 | Even |

## Pace and tendency

Both teams combined: **138.9 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| PITT Pittsburgh | **70.6** #16 | **50.8%** #29 |
| MIA Miami | **68.3** #40 | **44.2%** #84 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **9.0** #123 | **5.1** #101 | Even |
| Havoc rate % | **15.4** #85 | **13.1** #114 | NU |

### Pace and tendency

Both teams combined: **127.7 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| RUTG Rutgers | **66.2** #62 | **47.5%** #58 |
| NU Northwestern | **61.5** #111 | **38.4%** #117 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **126.6 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| WMU Western Michigan | **58.7** #127 | **37.5%** #120 |
| TOL Toledo | **67.9** #46 | **44.5%** #81 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **127.4 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| AKR Akron | **64.4** #78 | **50.4%** #31 |
| KENT Kent State | **63.0** #97 | **44.5%** #80 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

|---|---|---|
| ORE Oregon | **69.8** #23 | **49.4%** #42 |
| ILL Illinois | **62.0** #108 | **51.7%** #25 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Pts / trip (40) | **4.48** #36 | **2.74** #11 | Even |
| 3rd down % | **48.3** #26 | **30.8** #8 | Even |
| BIG PLAYS | | | |
| Explosive % | **12.4** #72 | **10.3** #51 | Even |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **4.7** #51 | **12.4** #1 | TENN |
| Havoc rate % | **13.4** #49 | **22.0** #4 | TENN |

### Pace and tendency

Both teams combined: **140.9 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| TENN Tennessee | **68.6** #35 | **41.0%** #104 |
| SC South Carolina | **72.3** #8 | **47.3%** #60 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **6.3** #85 | **7.3** #44 | BC |
| Havoc rate % | **16.3** #103 | **17.1** #41 | BC |

## Pace and tendency

Both teams combined: **124.2 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| BC Boston College | **62.7** #101 | **43.5%** #89 |
| GT Georgia Tech | **61.5** #111 | **51.5%** #26 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Pts / trip (40) | **3.96** #67 | **4.00** #101 | UCLA |
| 3rd down % | **49.4** #21 | **44.8** #116 | UCLA |
| BIG PLAYS | | | |
| Explosive % | **15.5** #21 | **12.2** #92 | UCLA |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **5.4** #65 | **6.2** #73 | Even |
| Havoc rate % | **15.0** #78 | **14.3** #92 | Even |

### Pace and tendency

Both teams combined: **130.4 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| MSU Michigan State | **63.9** #84 | **43.5%** #90 |
| UCLA UCLA | **66.5** #59 | **37.1%** #121 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Explosive % | **11.5** #87 | **12.6** #96 | Even |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **10.2** #131 | **5.2** #91 | HAW |
| Havoc rate % | **16.5** #106 | **13.8** #103 | Even |

### Pace and tendency

Both teams combined: **132.6 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| HAW Hawai'i | **70.1** #21 | **64.5%** #1 |
| NIU Northern Illinois | **62.5** #102 | **54.9%** #13 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

### Pace and tendency

Both teams combined: **131.0 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| BGSU Bowling Green | **57.1** #134 | **40.1%** #109 |
| BUFF Buffalo | **73.9** #7 | **41.4%** #102 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **11.3** #22 | **16.0** #54 | OHIO |

### Pace and tendency

Both teams combined: **129.1 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| EMU Eastern Michigan | **66.0** #65 | **55.6%** #8 |
| OHIO Ohio | **63.1** #96 | **36.1%** #123 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **134.3 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| UL Louisiana | **66.1** #63 | **35.1%** #127 |
| USM Southern Miss | **68.2** #42 | **51.9%** #23 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **8.8** #118 | **7.1** #48 | BOIS |
| Havoc rate % | **19.8** #135 | **17.8** #30 | BOIS |

### Pace and tendency

Both teams combined: **133.2 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| BOIS Boise State | **69.8** #23 | **35.6%** #124 |
| WSU Washington State | **63.4** #92 | **53.6%** #16 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **140.1 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| COLO Colorado | **70.3** #18 | **50.5%** #30 |
| OKST Oklahoma State | **69.8** #23 | **50.1%** #34 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Sack rate % | **6.5** #88 | **9.9** #8 | GAST |
| Havoc rate % | **14.5** #69 | **17.4** #36 | GAST |

## Pace and tendency

Both teams combined: **128.9 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| GAST Georgia State | **67.8** #48 | **38.4%** #118 |
| ARST Arkansas State | **61.1** #115 | **48.4%** #48 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| Havoc rate % | **17.2** #115 | **15.7** #67 | MISS |

### Pace and tendency

Both teams combined: **134.5 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| MISS Ole Miss | **67.7** #49 | **53.5%** #17 |
| TEX Texas | **66.8** #57 | **44.3%** #82 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| FINISHING DRIVES | | | |
| Pts / trip (40) | **3.97** #65 | **3.66** #75 | Even |
| 3rd down % | **41.8** #67 | **33.3** #24 | SYR |
| BIG PLAYS | | | |
| Explosive % | **12.0** #79 | **11.8** #85 | Even |
| PASS RUSH AND HAVOC | | | |
| Sack rate % | **7.4** #102 | **8.1** #23 | SYR |
| Havoc rate % | **15.5** #86 | **20.3** #11 | SYR |

## Pace and tendency

Both teams combined: **137.5 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| SYR Syracuse | **80.5** #2 | **48.9%** #46 |
| UNC North Carolina | **57.0** #136 | **47.8%** #56 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

## Pace and tendency

Both teams combined: **138.7 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| USU Utah State | **62.2** #106 | **54.3%** #14 |
| TXST Texas State | **76.5** #4 | **34.0%** #130 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.

| PASS RUSH AND HAVOC | | | |
| Sack rate % | **11.7** #135 | **6.2** #73 | NDSU |
| Havoc rate % | **12.1** #29 | **16.1** #53 | Even |

## Pace and tendency

Both teams combined: **127.4 plays per game** (FBS average 131.3)

| Team | Plays / G | Early-down pass rate |
|---|---|---|
| NDSU North Dakota State | **63.9** #84 | **32.9%** #131 |
| UNM New Mexico | **63.5** #90 | **32.0%** #133 |

Plays are runs and passes (sacks count as passes). Early-down pass rate = share of 1st- and 2nd-down plays that were passes. Rank 1 = most plays, most pass-heavy.

Longer bar, better rank. Ranks are out of 138 FBS teams. The edge goes to whichever side ranks at least 26 spots better; INT compares interceptions thrown by the offense with interceptions made by the defense. Rush Yds / Att is season rushing yards divided by rushing attempts, with sacks counted as rushes the way college box scores do. EPA / play (expected points added per play) and Success % (share of plays with positive EPA) use every run and pass play from cfbfastR play-by-play; for a defense they're what it allowed, so lower is better. Pts / trip (40) counts every drive that reached the opponent's 40, at 7 for a touchdown and 3 for a field goal. Explosive % counts passes of 20+ yards and runs of 10+ per play. Sack rate is per pass play; havoc rate is plays with a tackle for loss, sack, interception, fumble or pass breakup, per play. For both, lower is better for an offense and higher for a defense.
