CFB Week 11 Matchup Report

Who is set up for a good game, and who is not, in all 67 games of Week 11, from Tuesday, Nov 10 through Saturday, Nov 14. After the game pages come three rankings across the whole slate: the best overall matchups, the players most likely to score a touchdown and the highest every-game floors at each position.

HOW TO READ THIS

Method. Each player's per-game production is compared with how the opposing defense ranks against his position (backs, receivers, tight ends) and against the pass. Ranks are out of 138; #1 is the stingiest defense.

Source. Every number comes from the CFB dashboard (rhyman7.github.io/cfb), with stats through Week 10 and lines as of Nov 10. The report is built automatically after each data update.

Lines. Every game has a spread and total in the data.

Injuries. Source: Conference availability reports where a team has one; otherwise Covers.com team injury pages, plus news reports where noted, as of Nov 10, 7:42 PM ET. Players listed out, doubtful, on IR or suspended are left out of the picks and named in the game read; questionable players stay in, tagged Q. Players who missed their team's last game are also left out. Schedule strength is not adjusted for.

Each dot is one spot on that week's list, left to right from #1 to #10; green means he scored a rushing or receiving touchdown. "Expected" adds up the board's chances. Prices are each book's anytime-TD odds before kickoff; the better one is bold. Weeks 2–7 are rebuilt from the board's projections (the chances weren't saved then).

Highest Floors

The 15 highest every-game floors at each position across this week's games, from the value board: the yards he has reached in every game he has played this season (current team only, a quarterback's starts only, injury-shortened games left out; 3+ games). Players the board has ruled out are left out. Games: how many games the floor covers. Information, not a bet.
